

# SUMMER MATH WORK FOR THE OUTGOING 6<sup>TH</sup> GRADE

2017-2018

Outgoing 6<sup>th</sup> Grade:

In order to prepare for next year and to retain skills learned this year, we are utilizing the ALEKS program for summer math work.

Ten assignments will be created, and they will be available to begin working on by June 29th. These assignments will count as homework grades in the first trimester of next school year. Due on the first day of the 2018-2019 school year.

All assignments can be attempted multiple times and only the highest grade will count. In order to benefit from this review work, take your time, have pencil and paper next to you and take advantage of the tutorial ALEKS offers. This should be your work, and your work only!

Hope you have a great summer!

Ms. Glotzbier

Mrs. Colman
